### **SITRANS LR560 (HART): Siemens Milltronics Process Instruments Inc.**

Siemens Milltronics has improved the efficiency of the SIMATIC PDM Electronic Device Descriptions (EDDs) by removing the Instruction Manuals and reducing the EDD file size for download.

The manuals are available on the CD included with your Siemens Milltronics product, or can be downloaded from our website and added to your EDD by following the easy steps below:

1. To download the complete Instruction Manual, navigate to <http://www.siemens.com/SITRANSLR560>, and choose **Instructions and Manuals** in the **More Info** list.
2. To save the Operating Instructions on your local version of the EDD, overwrite the file

lr560\_user\_manual\_ha\_en.pdf found at the following location in the PDM Installation Directory (typically "C:\Program Files"):

Siemens\PDM\SIM\_PDM\devices\HART\Sensor\Level\Echo\Siemens\Sitrans\_LR560\V1

3. For additional product information, navigate to <http://www.siemens.com/SITRANSLR560>.
